

# The 2nd Carbon-based Electronics Development Forum

Taiyuan, Shanxi, October 28-30, 2024

## The 2<sup>nd</sup> Carbon-Based Electronics Development Forum

The 2<sup>nd</sup> Carbon-Based Electronics Development Forum will be held in Shanxi University, Taiyuan, Shanxi from October 28 to 30, 2024.

Established by Professor Lian-mao Peng and Professor Yan Li from Peking University, this forum follows the successful "International Workshop Celebrating the 30th Anniversary of the Discovery of Single-Walled Carbon Nanotubes and the 1st Carbon-Based Electronics Development Forum", which was held at Shanxi University in October 2023. The forum aims at becoming a platform for discussing the latest advancements and significant achievements in carbon-based materials, micro-nano devices, and integrated circuits in China.

To promote the sustainable development of carbon-based electronics, the 2nd forum will invite several distinguished scholars, including Prof. Sumio Iijima, the discoverer of single-walled carbon nanotubes. We cordially invite you to join us at the Boya Lecture Hall of Shanxi University in Taiyuan, Shanxi, from October 28 to 30.

Looking forward to your participation!
