

International Workshop  
Celebrating 30 Years' Anniversary  
Since the Discovery of SWCNTs  
Taiyuan, Shanxi, October 26-28, 2023

## **International Workshop Celebrating 30 Years' Anniversary Since the Discovery of SWCNTs Announcement**

International Workshop Celebrating 30 Years' Anniversary Since the Discovery of SWCNTs (SWCNT30) will be held in Shanxi University, Taiyuan, Shanxi from October 26 to 28, 2023.

It has been 30 years since Mr Iijima discovered single-walled carbon nanotubes (SWCNTs) in 1993. Their unique structure endows them with astounding chemical, physical, and mechanical properties, igniting significant interest and high expectations for various applications. Following Iijima's groundbreaking discovery, CNTs immediately captivated the scientific community, as evidenced by the substantial increase in annual publications during the first decades of the 21st century.

To commemorate this milestone, an international workshop is being organized to celebrate the 30th anniversary of the discovery of SWCNTs. We cordially invite you to join us at the Boya Lecture Hall of Shanxi University in Taiyuan, Shanxi, from October 26th to 28th. We welcome your participation and the opportunity to exchange ideas within the fascinating world of carbon materials!

Please find more information in the official website: <http://swcnt30.cn/>

Honorary Chairman: Prof. Sumio Iijima

Honorary Chairman: Prof. Shoushan Fan

Chairwoman: Prof. Yan Li

Host: Peking University

Institute of Carbon-based Thin Film Electronics, Peking University, Shanxi

Co-organizer: Shanxi University

Tel: +86-13546336125 / +86-17009014567
